ASFINAG

& SWITCH TO DIGITAL, PLEASE

From 1 December 2026 Digital Vignettes Only for Austria's Motorways and Expressways

The 10 Most Important FAQs about the end of the adhesive Vignette

1 When will the adhesive vignette no longer be valid?
From 1 February 2027, only the Digital Vignette will be valid. Until 31 January 2027, both adhesive and digital vignettes can still be used in parallel. Sales of the adhesive vignette will end on 30 November 2026. From the start of the 2027 vignette year, only Digital Vignettes will be available for purchase.

2 Where can tourists purchase a Digital Vignette?
Digital Vignettes can be purchased online at shop.asfinag.at as well as through authorised sales partners, including service stations, tobacconists and automobile clubs. A complete list of ASFINAG sales outlets can be found at: *asfinag.at/vertriebsstellen*
Additional vending machines will also be available at key border crossings for maximum convenience.

3 Is the Digital Vignette valid immediately?
Short-term vignettes (1-Day and 10-Day Vignettes) are always valid immediately. For online purchases of 2-Month and Annual Vignettes, a statutory waiting period of 18 days applies to consumers. This is due to the legally mandated cancellation period for online purchases. The waiting period does not apply when purchasing as a business customer. If you purchase a Digital Vignette directly from a physical sales outlet, all vignette types are valid immediately and the 18-day waiting period does not apply.

4 What information do I need when purchasing a Digital Vignette?
The most important requirement is your vehicle's correct licence plate number and the desired validity period. The Digital Vignette is linked directly to the vehicle's licence plate.

5 What if I am only passing through Austria for a few hours or a short holiday?
A valid vignette is required before using any vignette-regulated motorway or expressway, even for short visits or transit journeys. For these situations, the 1-Day Vignette is the ideal solution.

6 How will holidaymakers and travellers be informed about the change?
ASFINAG will support the transition with a comprehensive information and awareness campaign both in Austria and internationally. In addition, clearly visible multilingual signs at all border crossings will provide important information about the vignette requirement.

7 How can I be sure I am buying from an official sales channel?
Please purchase Digital Vignettes only through the official ASFINAG Toll Shop at shop.asfinag.at or through authorised sales partners. A list of all official sales outlets is available at: *asfinag.at/vertriebsstellen*
We strongly advise against purchasing from fake websites or unofficial resellers, as they often charge excessive prices and may sell products that are not valid.

8 What happens if I enter the wrong licence plate number?
Please check the licence plate number carefully when purchasing. To help prevent errors, the online purchase process requires the licence plate number to be entered twice rather than copied and pasted. Our authorised sales partners can also assist with accurate entry. For added convenience, we recommend having a photo of your licence plate or your vehicle registration document available when making a purchase. Please note that a general goodwill correction policy is not provided.

9 What if I do not have a smartphone, internet access or an online payment method?
No problem. The Digital Vignette can still be purchased in person through authorised sales outlets. For holidaymakers and travellers, toll stations, service stations, tobacconists, automobile clubs and vending machines remain convenient points of sale throughout Austria.

10 How can I check whether my vignette is valid?
You can verify the validity of your vignette online by entering your licence plate number at: *evidenz.asfinag.at*
You will also receive a purchase confirmation or receipt as proof of purchase.
